Summary

Senior Frontend Engineer with 8+ years of experience building and scaling enterprise SaaS products at Zoho Corporation. Specializes in UI architecture, design systems, and performance optimization for applications serving 100,000+ global users. Proven ability to lead UI revamp initiatives, mentor junior developers, and ship high-quality, maintainable code across complex product environments. Increasingly leveraging AI tooling to accelerate frontend development workflows.

Experience

Zoho Corporation Pvt Ltd Chennai

Web Developer (Senior-Level) Mar 2020 – Present

- Led UI revamp of critical modules in ServiceDesk Plus, adopted by 100,000+ enterprise users across 5+ major workflows — reducing reported UI inconsistency issues by ~40%.
- Improved page load performance by migrating from sprite-based icon loading to inline SVG URIs, cutting render-blocking requests significantly.
- Architected and delivered a reusable UI component library used across multiple modules, improving consistency and reducing development time for new features.
- Implemented Grunt + Node LESS compilation pipeline, standardizing the build process across the entire project.
- Built complex data-driven workflows including PDF/DOCX generation, multi-step forms, and role-based UI rendering.
- Drove code quality through regular code reviews, mentoring 3+ junior developers, and enforcing UI standards across the team.
- Ensured WCAG accessibility compliance, cross-browser compatibility, and responsive performance across all major browsers.

Meye Management Pvt Ltd Chennai

Software Developer May 2018 – Feb 2020

- Built full-stack web and hybrid mobile applications (Angular, Ionic 3) — 2 apps published on Google Play Store and Apple App Store.
- Integrated Razorpay payment gateway and automated PDF generation workflows using PHP/Laravel.
- Implemented modern and classic UI skins in DevExpress for enterprise analytics dashboard (Analyst Golden Eye).
- Developed REST APIs and backend modules in Laravel/PHP supporting core business logic.

Suriya Informatics Solutions Pvt Ltd Chennai

Java Developer Intern Nov 2017 - Feb 2018

- Developed backend modules for a student enrolment system using Spring MVC, including database connectivity and API integration.
- Participated in code reviews and agile team meetings, gaining hands-on experience with professional development workflows.

KEY PROJECTS

ServiceDesk Plus (Zoho)

Role: Web Developer

Technology : *JSP, Handlebars, LESS, Grunt, Python, Shell Script*

- Led frontend revamp of 5+ core ITSM modules used by 100,000+ global enterprise users.
- Reduced page weight and improved rendering speed by migrating to SVG URI-based icon system.
- Standardized the frontend build pipeline using Grunt + Node LESS compilation.

Analyst Golden Eye (Meye Management)

Role: UI Developer

Technology : *Laravel, DevExpress, PHP*

- Delivered modern and classic UI theme skins using DevExpress component library.
- Built and documented REST APIs for core analytics workflows.

Yunowat (Meye)

Role: Full Stack Developer

Technology : *Laravel, PHP, SQL, Razorpay*

- Integrated Razorpay payment gateway end-to-end, from frontend checkout to server-side verification.
- Automated PDF invoice generation using PHP, reducing manual processing overhead.

Family Book / Task Pro (Meye)

Role: Mobile App Developer

Technology : *Ionic 3, Razorpay, PDF Generation*

- Built and shipped cross-platform mobile apps with push notifications, reminders, and PDF exports.
- Successfully deployed both apps to Google Play Store and Apple App Store.

AI-AUGMENTED DEVELOPMENT

- Built a customizable chatbot UI with MCP (Model Context Protocol) server integration for real-time AI interactions.
- Replaced a Bootstrap-based design system with a custom AI-driven UI framework, improving design consistency and reducing CSS bloat.
- Developed a Chrome extension for automated UI regression testing, reducing manual QA time for frontend releases.
- Created a Python tool for design system color unification, standardizing token usage across a large codebase.
- Built and published a VS Code extension to detect and merge duplicate CSS selectors, improving stylesheet maintainability.

Skills

- **Frontend** : Expert in HTML5, CSS, JavaScript, TypeScript
- **Frameworks** : Angular, Ember, jQuery, Bootstrap
- **Styling** : LESS, SASS, Tailwind
- **Tools** : DevExpress, Handlebars, Grunt
- **Backend** : Laravel, PHP
- **Others** : REST APIs, Python, Shell Script

Education

Narasus Sarathy Institute of Technology Salem • 2014 - 2018

B.E – Computer Science and Engineering

Notable Achievements:

- Runner Up (Regional Level), TATA Crucible International Quiz Competition 2017
- First Prize – Presentation on Brain Gate System, Knowledge Institute of Technology (National Level Technical Symposium)
- Third Prize – Presentation on Exascale System, Paavai College of Technology (National Level Technical Symposium)
- First Prize – Presentation on LiFi Communication, Narasu's Sarathy Institute of Technology (National Science Day)
- First Prize – Presentation on Smart Dust, KSR College of Technology (National Level Technical Symposium)
- First Prize – Presentation on Ambient Technology, PSV College of Technology (National Level Technical Symposium)
- First Prize – Web Designing, PSV College of Technology (National Level Technical Symposium)
- First Prize – Project: Automatic Home Watchdog Robot, Narasu's Sarathy Institute of Technology (Engineer's Day)
